Professional Summary

Backend Developer with 1.5+ years of experience building backend systems, automation tools, and data-driven applications. Focused on solving production issues, optimizing database operations, and creating reliable software solutions. Enthusiastic about Artificial Intelligence and Machine Learning, actively exploring projects to expand technical skills.

Technical Skills

Backend Development: C#/.NET, Python (Flask), Java, REST APIs

Databases: MySQL, MongoDB, Firebase Firestore, Supabase (PostgreSQL)

System & Automation: Scheduling, Logging, System Monitoring, Hashing

Tools & Platforms: Git, Linux, Agile, SDLC, Render, Cloudinary

Programming: Python, C#, SQL, Java

Work Experience

Software Developer – Backend & Automation Systems

May 2023 – Oct 2024

Paveway Automation, Pune

- Developed industrial automation applications using C#/.NET to monitor and control machinery operations.
- Implemented business logic, validation workflows, and configuration modules for real-time machine functionality.
- Engineered and optimized MySQL stored procedures and database schemas for logs and analytics reporting.
- Diagnosed and resolved production issues, performing root cause analysis and improving system stability.
- Collaborated with clients to implement custom features and enhancements based on operational requirements.

Projects

Realeye – Interview Preparation Platform (In Development) — [GitHub](#)

Flutter + Python (Flask) + Java (Spring Boot) | Supabase | Firebase | Render

- Architected a multi-service backend separating interview logic (Flask) and content modules (Spring Boot).
- Developed REST APIs for authentication, session management, and structured evaluation using Firebase and Supabase.
- Deployed backend services with production-ready configurations on Render.

Automated Disk Sanitizer — [GitHub](#)

Python, OS Module, MD5 Hashing, Scheduling

- Built an automation tool to scan directories, detect duplicate files using MD5 hashing, and safely remove redundant copies.
- Implemented scheduled execution with automatic logs and system reporting.

Platform Surveillance System — [GitHub](#)

Python, psutil, System Monitoring

- Developed a periodic system monitoring tool capturing CPU, RAM, disk, network, and per-process statistics using psutil.
- Generated structured, timestamped logs for continuous background monitoring.

Automate Data Shield — [GitHub](#)

Python, Incremental Backup, ZIP Compression

- Designed an incremental backup solution comparing MD5 hashes to identify modified files.
- Automated periodic data protection using compressed timestamped ZIP archives while preserving directory structure.

Education

Master of Computer Applications (MCA)

Savitribai Phule Pune University

Aug 2024 – 2026

GPA: 8.40 / 10

Bachelor of Computer Applications (BCA)

Swami Ramanand Teerth Marathwada University

Jun 2020 – Apr 2023

GPA: 7.19 / 10
